Mr. Naessens,

I confirm by the present that I have requested access to 714X manufactured by CERBE Inc. under Health Canada's (Department of Health, Government of Canada) Special Access Programme since December 1991 for 114 patients for a total of 1656 authorizations, numbers provided by your company.

My professional experience with this product may be summarized as follows:

1. I have observed no adverse reactions or side effects in patients using this product under my care due to the use of the product.
2. For many patients using the product, I have observed an increase in quality of life as well as an increase in life expectancy.

I can therefore testify that, for those patients suffering serious or debilitating illnesses for which I have requested 714X within the Special Access Programme, I have observed that 714X benefited them without causing any undesirable adverse reactions or side effects and that this justified my professional judgment to use this product.

The experience I acquired with this product resulted in my recommending it to others for whom this product was well indicated as conventional treatments had been exhausted or proven ineffective.

Please accept my best regards,

Dr. Daniel Toledano, md.
