The User's Guide (the exhaustive version) will be provided to you with the purchase of the 714X.

This guide is an informative and user-friendly tool to use the product safely, and to make sure the manufacturer's guidelines are well understood.

The inhalation technique will be described step by step.

This document is intended to be a summary of the main steps of the inhalation technique. It should not, at any time, replace the User's Guide, which remains the best reference before starting the usage of the 714X.

# SUMMARY OF STEPS

## 714X INHALATION TECHNIQUE

### STEP 1:

Gather the required material according to the instructions presented in the User's Guide.

#### Material:

- A clean, solid and stable table, located near an electrical outlet, as well as a comfortable chair
- An ultrasonic nebulizer. This device can be purchased or rented in specialized medical equipment shops.
- A box of seven single-dose ampoules (2 ml) of 714X for inhalation
- Bottled distilled water for the proper functioning of the nebulizer (optional depending on the model)
- 94% alcohol (equivalent to **ethyl alcohol** available in liquor stores)
- A box of tissues or paper towels
- A biomedical waste container available in pharmacies

### STEP 2:

Wash your hands properly. Disinfect the nebulizer tip.

### STEP 3:

Fill the nebulizer with distilled water.

### STEP 4:

- 1- Insert the small cup into the nebulizer.
- 2- Pour the 714X ampoule into the small cup.
- 3- Put back in place the head of the nebulizer.

## STEP 5:

Inhale the product according to the instructions included in the User's Guide.

## STEP 6:

Clean the appliance and store it properly.
